

Product Guide

Y Strainers

Croft can not only supply Y Strainers, but specialise in supplying the right element for your specific process.

Y Strainers are common to find across many different industries. Named after their shape, the system offers a simple but effective filter solutions.

The housings can be used in pressurised lines for liquid or gas and can also be used in suction and vacuum conditions. The filter elements can be manufactured with perforated plate and wire mesh to filter to the required micron.
